## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-2 and 5-9 are allowed (renumbered as 1-7).
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest, in the claimed combination, a method for indicating the status of a battery in a portable computing device, comprising:

retrieving battery status data from a basic input-output system (BIOS) on the computing device by an applications program initiating a BIOS interrogating routine to retrieve battery status, the battery status data reflective of a characteristic of the battery;

comparing the retrieve battery status data to a predefined battery status threshold stored on the computing device; and

based on the comparison of the battery status data to the predefined battery status threshold, providing a battery status indicator to the applications program executing on the computing device, wherein the application program includes a user interface to a remote network, for integration into the user interface of the application program.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
